

Reading reports | Daily reports

Daily reports provide details of what was recorded the previous day.

Daily reports provide details on:

1. The percentage of what was recorded correctly on the system for the day.
2. Total waste value and weight for the day
3. Shows how many meals and CO2e was created with the waste weight for the day.
4. Shows waste value trend for last seven (7) days.
5. Shows waste value and weight grouped by food items with indication of trend compared to last period
6. Shows waste value and weight grouped by stages.
7. Shows waste value according to meal period.

Reading reports | Summary reports

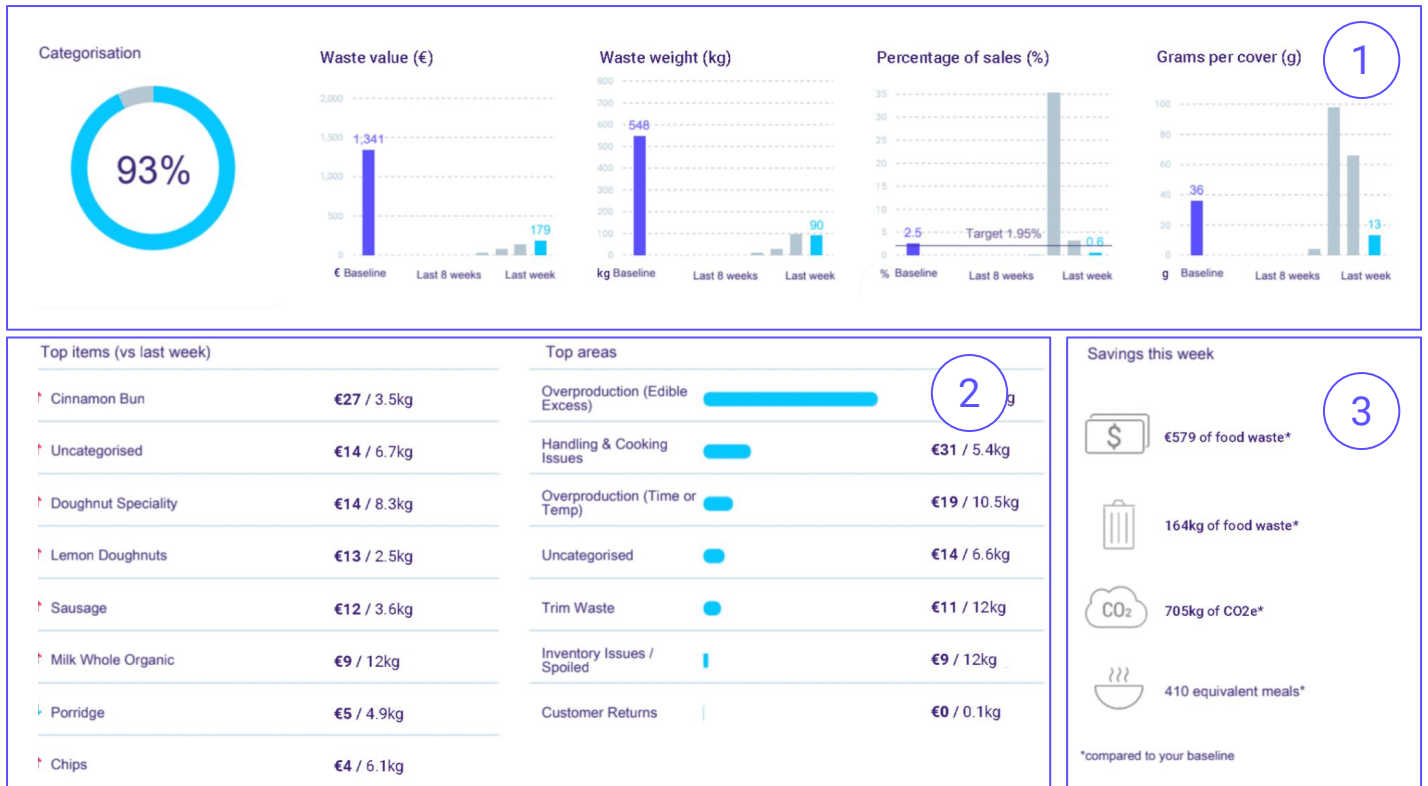

We offer various summary reports that provide details on a specific period of your choosing: weekly, monthly, and quarterly basis.

All summary reports consist of the following:

1. The percentage of what was recorded correctly on the system.
2. Sum of waste value for the period selected
3. Sum of waste weight for the period selected
4. The chart shows the (sum of waste value / sum of sales) for the period selected, last 8 periods and baseline period.
5. Grams per cover in the last 8 periods compared to baseline
6. Shows waste value and weight grouped by food items with indication of trend compared to last period.
7. Shows waste value and weight grouped by stages.
8. Savings in value, weight, CO2e and meals.

Reading reports | Summary reports
