Recording waste

You throw food waste into Winnow bin, the AI will suggest a shortlist of items for you to select and it might ask to select the areas (this only happen when the AI is not confident).
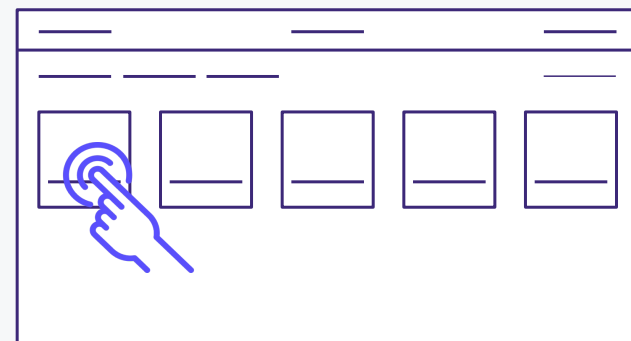

0.

AI predicts food

1.

Select food item from top 8 items presented

2.

Select waste stage

Step 1 and/or 2 (or both) might be skipped by the new app (should there be the right conditions)

3.
